

Dear _____

I am writing to urge the federal government to reject any demands for a future airport in Pickering and reject any non-agricultural development on the airport site. The land, expropriated in 1972, is almost entirely Class 1 agricultural land, the most productive there is. With the climate crisis deepening, we must provide for the fundamental needs of future generations and preserve this farmland as a secure source of local food for Canada's largest urban centre. The well-being of our children and grandchildren will rest on the decisions we make today, and one of the most critical involves food land protection.
