

Timeline: 2020-

An “Aerotropolis” in a Time of Climate Change and COVID-19?!

An “Aerotropolis” in a Time of Climate Change and COVID-19?!

2020

- **January** – The year starts with a flurry of op-eds and articles by people suggesting (or claiming) that 2020 will be the year when Pickering airport gets the go-ahead. Is this insider knowledge? A little digging reveals that the claims are just wishful thinking on the part of a few. We cry foul and our complaints prompt some revisions to articles.
- **Jan. 9** – In an op-ed on the website of the Canadian Owners and Pilots Association, a COPA member writes: “More opposition is coming from environmentalists, questioning the wisdom of building an airport when air transportation is a significant contributor of greenhouse gases.” And he takes aim at Durham’s Regional Chair: “Perhaps [John] Henry needs a primer on the results of the last time the federal government built a major airport.”
- **Jan. 15** – We discover that the City of Pickering and an entity called Toronto East Aerotropolis are both listed as clients of one Melanie Greenwood, graphic designer, who apparently once hailed from this area but now lives and works in California. One of the items in her portfolio? A logo for the aerotropolis. Did taxpayer money go to the U.S. for a logo for a non-existent airport? As we’re looking into this, the logo disappears from the site and only the client list remains, unchanged...
- **Jan. 17** – We make a preliminary delegation at the Durham Region Roundtable on Climate Change, pointing out that while we agree with Durham’s declaring a climate emergency, the Region’s emissions-reduction and climate-adaptation planning will be pointless if its political leadership simultaneously pushes for an aerotropolis, which would add massive volumes of new emissions to the Region’s tally. The prime farmland it would destroy is currently a carbon sink. It should be protected and made a significant part of the Region’s climate action plans.
- **Jan. 22** – The Council of the Town of Newmarket declares a climate emergency. The text is short, to the point, and utterly unambiguous in terms of the Town’s intention to do everything necessary to adapt to the difficult times ahead. The difference between this clear motion and Pickering’s (all denial) is breathtaking.
- **Jan. 24** – The *Sudbury Star* runs a terrific – and unexpected – piece by columnist Steve May: “No new airport in Pickering in a time of climate crisis.” He asks: “Could 2020 be the year that the federal government decides, once and for all, that building a new airport northeast of Toronto is simply not compatible with achieving Canada’s climate targets?”
- **Jan. 25** – *Canadian Geographic* has confirmed that a photo-and-text submission of ours has been accepted for the March/April issue as part of an article on Relocation, a new project highlighting the forced movement of Canadian communities. Our story will appear in the online version.
- **Jan. 29** – Sari Sarieedine, chair of our Youth Wing, delivers LOL’s presentation before Durham Regional Council prior to Council’s debate and vote on its own Climate Emergency Declaration. Once again, we point out that adding an aerotropolis is incompatible with the Region’s aim to

reduce its greenhouse gas emissions. Whitby's mayor delivers an impassioned speech in support of the motion, there is pushback from two other councillors, and the motion is carried, 23-2. The degree of overall commitment by Council remains to be seen.

- Cadillac Fairview and Armadale Co. Ltd. (owned by the Sifton family) announce that the 170-acre Toronto Buttonville Municipal Airport site will be sold. Cadillac Fairview claims it wants to concentrate on developments in downtown Toronto. There is no word from Armadale, but the years of unproductive wrangling with the Town of Markham and the OMB over the new site plan and its ramifications for the town no doubt played a role in the decision.
- **Feb. 3** – A letter is sent by LOL as a follow-up to the Jan. 29 Regional Council meeting, providing Ajax Mayor Shaun Collier with information he requested regarding constraints on successful vertical farming in North Pickering. The regional chair and all councillors are copied. (No one acknowledges the letter or replies to it.)
- **Feb. 24** – We send letters to all federal ministers, explaining the situation on the Lands, showing (where pertinent) how the health of the Lands tallies with certain aspects of their mandate, and (in case of a pro-airport KPMG report) asking them, as Cabinet members, to vote to protect this farmland.
- **Mar. 5** – Transport Canada quietly releases KPMG's report: 400+ pages covering the study period 2016-2036. The date of release is 48 years and 3 days after the original airport announcement...
- Transport Canada does not issue a media release.
- Our Pickering-Uxbridge MP does put out a news release: "The report states that no decision has been made to develop an airport on the Pickering Lands, and that there will be no immediate need for an airport until at least 2038 [sic] ... Transport Canada will retain the land for future consideration. ... Any decision on the future of the Pickering Lands will be made based on a sound business case and demonstrated aviation demand and capacity, as well as a thorough analysis of several regional and national factors, including environmental impact."
- MP O'Connell, adds: "An airport in Pickering cannot, and should never have been, a substitute for a real job creation and economic growth strategy that would benefit our community now. Infrastructure projects of this scale can only be viable under the right conditions, and cannot be rushed or manipulated to fit local strategic planning. The KPMG Aviation Sector Analysis clearly articulates that there is no demand for the immediate development of an airport. ... The facts are evident and publically available. It's time for all levels of government to work together to create real economic prosperity and opportunity for our community, while protecting our environment, fighting climate change and supporting our agricultural industry."
- We go through the Report with a fine-tooth comb. It is heavily redacted in parts, but not enough to hide the overall conclusion: KPMG finds that "a new airport is not expected to be required in southern Ontario prior to 2036 to meet the forecast demand." And it states clearly that, with modifications and modest expansions to existing facilities in the Southern Ontario Airports Network, there will be a considerable gap in 2036 between the capacity available and the [smaller] demand that can be expected. In fact, the gap is so great that it becomes immediately clear that an airport at Pickering may *never* be needed, and that Transport Canada's continued insistence on dangling the airport carrot (or threat) cannot be justified.

- Important note: While the report refers (once) to possible future policy changes concerning emissions, it includes not a single mention of climate change and how it will affect aviation worldwide. If this issue had been factored into the analyses, **the forecasted 64% gap between capacity and expected demand in 2036 would have been even greater.**
- Although Transport Canada's website claims that "the report was *not* intended to provide a recommendation on whether to build an airport on the Pickering Lands," we know that, had KPMG identified a need for the airport, the pro-airport lobby's pressure on Transport Canada to act on this finding would have been instant and considerable. Will the Supply and Demand Report's unequivocal conclusion put an end to the lobbying?
- Pickering's mayor, his solidly pro-airport CAO, and Durham Region's chair all manage to spin the KPMG conclusions 180 degrees. Mayor Ryan is quoted as saying that he thinks the study has found that the airport *will* be needed in 2036 and he calls this "great news." The CAO professes to be "thrilled." Chair Henry finds the report's conclusion "exciting" and feels "encouraged."
- There is some local media uptake but, from a news point of view, the report's conclusion means that nothing has really changed. So the limbo continues, as does the uncertainty – but there is much less uncertainty than before.
- **Mar. 6** – All the news is suddenly about COVID-19. Twenty confirmed cases in Ontario now. Within days there will be little else in the news feeds.
- We learn from the results of a Pickering resident's Access to Information request that Pickering's CAO was busy seeking sizable contributions from other local governments in 2019 to help Pickering fund a study that would rebut our 2018 agricultural study – and some of those officials were delighted to offer financial help!
- **Mar. 8** – On our Facebook page, Pickering Councillor Maurice Brenner writes: "While I can not speak for the Council, I have reviewed the KPMG Executive Summary and this is my position. The [Pickering] 2017 adopted Motion supported an Airport conditional on the outcome of a business case from the KPMG Report. I believe without a business case for today and for decades this condition has not been met which nullifies Pickering Support for an airport. I will be working to refocus City priorities [putting] an emphasis on addressing climate change and environmentally friendly new modes of transportation that will achieve the goal of 0 Carbon Footprint by 2050 – such as High Frequency Rail Service utilizing the Havelock line from Windsor to Montreal with a stop in Pickering."
- **Mar. 10** – The Durham Post reports on the KPMG study and blatantly misrepresents the study's conclusion, saying that "Last week, Transport Canada released its KPMG Aviation Sector Analysis, which confirmed that the Greater Toronto Area (GTA) needs a new airport in 2036." The report said nothing of the kind. The public comments beneath all the current pro-airport articles are almost uniformly opposed to an airport.
- **Mar. 11** – We hold our last in-person executive meeting for the foreseeable future; the country is shifting into shelter-in-place mode to try to slow the rate of COVID-19 transmission. We will soon be obliged to postpone our AGM.
- **Mar. 18** – Councillor Brenner asks Pickering staff to shift priorities from advocating for an aeropolis to advocating for a Pickering station on the future higher-speed Havelock line that is under consideration by Ottawa. There are no objections by other councillors.

- **Mar. 25** – Transport Minister Marc Garneau writes to John Henry, Durham Regional Chair, in reply to two missives of Henry's (Nov. 6 and Dec. 10, 2019) requesting public release of the KMPG study. The Minister notes that the study was released on March 5 and that "no decision has been made to develop an airport on the Pickering Lands. Any decision...must be based on a sound business case, updated data on aviation demand and capacity, and stakeholder engagement." He also says that "the ASA (Aviation Sector Analysis) suggests there is no immediate need for additional airport capacity in the Greater Toronto Area before 2038 [sic]...", thereby refuting claims by local pro-airport voices that the study said the opposite.
- **Apr. 2** – We send a letter to Pickering Council, demanding answers to a dozen questions raised by the Access to Information request (see Mar. 6). The CAO responds via e-mail (to short-circuit Council?), failing to answer most of the questions. His e-mail address does not accept replies...
- **Apr. 4** – The number of US air passengers has dropped 95% in a month, thanks to COVID-19. The situation applies worldwide.
- **Apr. 19** – We post our full "Response to the KMPG Study Report," a compilation of important passages and revelations, heavily annotated, with the Report's findings and conclusions clearly underlined. Those conclusions are unambiguous. No airport needed and not even a hint of when it might be needed. If ever.
- **Apr. 21** – Articles on the importance of growing food locally are starting to crop up everywhere. The fragility of global food supply chains is becoming evident as the effects of lockdowns are felt.
- **Apr. 27** – Councillor Brenner fails to get Council's backing to stop expenditure on the aerotropolis project even though all other major expenditures of the City have been paused for the duration of the general COVID-19 shut-down. He quizzes the director of economic development (sitting in for the CAO during the virtual council meeting) about an Ottawa lobby group he has learned about, that has been hired to press Transport Canada to proceed with a Pickering airport. He finally manages to obtain some details: the lobbyists (called Counsel) have been hired by Durham Region, and the Region will be expecting Pickering to help fund the costs. Who knew about this? Just staff? Or were Pickering's mayor and just some councillors in the loop?
- **May 28** – Transport Canada responds to our request for (a) the full cost of the KPMG analysis study and (b) a cost breakdown by individual report. The full cost: \$799,710.61, of which the Supply and Demand report claimed \$281,189.09; the Contextual Bridge report, \$27,000.00; the Type and Role report, \$99,787.91; and the Revenue Generation and Economic Impact Report, \$391,733.61. In other words, almost three quarters of the cost of this study went on "what if" exercises to do with a potential airport "that could support economic growth," apparently supported by "anecdotal evidence" (Type and Role report, p. 2). It's worth noting here that "anecdotal" generally means "unreliable," something based on personal accounts rather than scientific evidence.
- **May 29** – Invest Durham releases the results of Durham Region Business Survey #3, on the business community's evolving needs during the COVID-19 pandemic. Some 400 businesses responded. Although the survey offered the building of a Pickering airport as one way to boost Durham Region's economic recovery, almost 70% of businesses indicated that they wanted to see programs or strategies that would "bring the local food & agriculture sector into the Region's downtowns." The top three strategies they selected to aid the recovery were "expanding high speed internet, supporting local programs and incorporating agri-business into urban downtown areas."

- **Jun. 8** – The International Air Transport Association (IATA), the largest airline lobby group, produces a diagram (“Return to growth post-COVID but at a lower level”) showing expected aviation growth by 2025 to be a mere 10% lower than pre-pandemic forecasts.
- Pearson’s latest stats are posted: the airport has seen a 96.8% drop in overall passenger numbers compared with the previous year, and an 85.1% drop in total aircraft movements.
- **Jun. 12** – Pickering’s pro-airport CAO, Tony Prevedel, retires.
- **Jun. 14** – CBC News runs an excellent article: “Environmentalists, farmers renew push to shelve Pickering airport, save prime farmland.” Very timely, with the need for improving food security ever more evident as the pandemic persists. Despite the Transport Minister’s letter regarding no need (so no plans) for an airport, Regional Chair Henry promotes a Pickering airport in the article. Meanwhile, the media worldwide describe empty airports, grounded fleets, cancelled orders for new planes, a devastated tourist industry, widespread hesitation about flying again... The future is a complete unknown.
- **Jul. 9** – Pickering Council endorses a Ministerial Zoning Order (MZO) that would allow a 4,000-acre residential and commercial development called “Veraine” on prime farmland a few kilometres to the east of the Federal Lands. The promotional material touts the planned subdivision’s “green” credentials and boasts of its proximity to a Pickering airport. We team up with Environmental Defence and others in a campaign to stop this plan.
- **Jul. 13** – Aviation analysts are now saying they don’t expect airline traffic to fully recover until the mid- to late-2020s.
- **Jul. 14** – The Canadian Press reports: “Greater Toronto Airport Authority cutting 500 positions due to drop in traffic.” Apparently, passenger levels at Pearson have fallen to 1996 operating levels.
- **Jul. 17** – We learn that the developer behind the Veraine proposal (Dorsay) was a sponsor of the 2018 APBOT “lunch and learn” pro-airport event. It has also been confirmed via an ATIP request that Dorsay was active in the lead-up to Pickering’s aerotropolis event in April 2019.
- **Jul. 23** – A Moody’s analysis: the commercial aviation industry will continue to be devastated by the coronavirus pandemic for years to come.
- **Jul. 27** – Cross-border air passenger numbers are down 99% compared with 2019.
- **Jul. 29** – Durham Regional Council votes unanimously (but for one Pickering councillor: Ashe) to oppose the Veraine development, and asks that the MZO be withdrawn.
- **Aug. 13** – Bloomberg reports that early signs of tentative airline recovery have been stalled by new virus flare-ups. IATA, known for its rosy forecasts, now predicts that 2019 traffic won’t been seen again until 2024 (formerly, 2023). “The situation is deteriorating,” says IATA Chief Economist Brian Pearce.
- **Aug. 31** – Pickering announces its plans to launch a local food strategy. A motion to begin the process had been introduced in June by councillors Maurice Brenner and David Pickles. The City currently has no economic development strategy re the potential of produce grown within Pickering – rather startling, given all the farmland in the municipality. Will the Lands be counted? (No, as it turns out; the City’s excuse is that it’s federal land so outside Pickering’s jurisdiction – which has never stopped Council from promoting an airport and indoor farming there.)

- **Sep. 8** – Amazon announces it will be opening a new fulfilment centre in Ajax in 2021, creating 1,000 jobs. Which only goes to prove, Pickering, that a local airport (or promise of one) wasn't a prerequisite for Amazon after all.
- **Sep. 8** – We lend our support to the Green Durham/Township of Uxbridge proposal to augment the trail system and create Uxbridge Municipal Park, which would, in part, border the Federal Lands.
- **Sep. 21** – As COVID-19 cases rise again after a dip during the summer, aviation analysts now anticipate “a lost decade for aircraft manufactureres and suppliers.”
- **Sep. 28** – Nav Canada, the private corporation that owns and operates the country's civil air navigation service (which includes air traffic control, flight information, weather briefings, and much more) is cutting its workforce by 14%, as the number of flights remain low, airlines drop routes and services, and our border with the U.S. and most other countries remains essentially closed.
- **Oct. 8** – Pickering's mayor continues to promote a Pickering “aerotropolis.” Today, he hosts (virtually) the City's “Second Annual Realtor & Developer Symposium.” Mayor and staff, in their contributions, ignore or distort both the content and conclusions of the KPMG report and the pandemic's disastrous and potentially long-term impact on aviation. The City's “forward-thinking” is really just more business as usual.
- **Oct. 15** – A supporter, responding to a challenge to parishes by the Anglican Bishop of Toronto to identify projects that would be beneficial to the environment, has chosen to support the protection of the Federal Lands as farmland, and launches an online petition to the federal government. Our MP, Jennifer O'Connell, has agreed to endorse and present it.
- **Oct. 27** – Aviation news remains dire. CNN reports that airlines are bleeding money, business travel isn't expected to return to its former levels (thanks to the convenience and lower cost of video conferencing), leisure travel will be slow to recover while people don't feel safe... To make matters worse, the articles suggest that none of the forecasts on the sector's future, bad as they seem, have factored in the impacts of climate breakdown and the necessity of lowering/eliminating emissions within the decade.
- The Airports Council International Europe (ACI Europe), which represents airport operators, reports that nearly 200 airports in the UK and Europe will “go bust” within months because of the “dramatic collapse in air travel” triggered by the pandemic. Apparently 193 of Europe's 740 commerial airports face insolvency if passenger traffic isn't well into recovery by year's end. As there's no guarantee of a vaccine by then, and no public vaccination timeline as yet, that end-of-year deadline will not be met.
- **Oct. 28** – GTAA president Deborah Flint, in a presentation to Durham Regional Council: Aviation significantly impacted by COVID-19; Pearson's passenger traffic down by 96%, almost 30% of the workforce laid off; with border restrictions and quarantines in place, GTAA not expecting passenger volumes to recover for years; not surprisingly, cargo flights increased. She stresses the importance of the 407/400 series highways and the need to integrate transportation services and transit connectivity. Not surprising again, no calls for a Pickering airport.
- **Nov. 22**– GTAA president Deborah Flint, in a presentation to Peel Regional Council: “We recognize this industry will be forever changed. This is absolutely the same for the GTAA. We have suffered significantly. We all have to prepare for a new future and a new reality. I expect we will have to coexist with COVID-19 for many years.” A Peel board member adds that the impact of COVID-19 on

airports and the travel industry has been “staggering” and that service providers must prepare for the future and rebuild confidence in air travel.”

- **Nov. 23** – Pickering’s mayor, in an address on economic development in the city, concedes that development of an airport hasn't yet received the green light but adds that "when" the decision is made, it will take up to 10 years to get the airport established and operational. “We need to get started now and that’s where the federal government really needs to start to be more directly involved ... We need to be proactive more than reactive or we’re going to find ourselves lagging behind in the world economy.” He seems utterly disconnected from the real world...
- **Dec. 9** – The Stay Grounded Network publishes a map of the world showing the locations of no fewer than 65 currently planned airports, Pickering among them.
- **Dec. 10** – In a letter to the editor of a local newsfeed, a frustrated Pickering resident calls for new local municipal leaders – including “leaders who don’t think a cargo airport in the greenbelt is a good idea.”
- **Dec. 11** – We release our latest research paper: “Indoor Farming and North Pickering.” It explains the pros and cons of indoor farming, compares it with outdoor farming, and shows, unequivocally, that local politicians’ embrace of vertical farming facilities as part of a Pickering airport (or aerotropolis) is uninformed and irresponsible. Such operations would be uncompetitive and could never make up for the loss of the prime farmland.
- **Dec. 13** – A *Wall Street Journal* tweet: “The pandemic has changed few professions as profoundly as that of the airline pilot. Young pilots with little seniority are being let go, older ones are taking early retirement and a generation of aspiring captains is being told not to bother for now.”
- **Dec.** – The month and the year end almost in silence. There is no further news on the fate of the Federal Lands, and Ontario is one of many jurisdictions around the world now facing tighter restrictions and broader lockdowns as COVID-19 cases continue to surge.

2021

- **Jan. 4** – Toronto Pearson has confirmed reports that its passenger numbers have declined to 1996 levels.
- **Jan. 12** – In a mini-shuffle, PM Trudeau moves Marc Garneau to Foreign Affairs and Omar Alghabra to Transport. Insiders assure us that this is *not* bad news for the Federal Lands.
- **Jan. 19** – We now have some answers regarding construction at the northwest corner of Hwy 7 and Sideline 26 on the Lands: Transport Canada has apparently leased property to the Region of Durham (and this seems to go back to 2014 or earlier) for the creation of a “Seaton Zone 4 Water Reservoir and Zone 5 Pumping Station”– even though the land is zoned agricultural.
- **Jan. 21** – *Ontario Farmer* reports that, 50 years later, raw emotions still linger over the expropriation of 97,000 acres of prime farmland for a Mirabel airport that only ever used 6,000. Most of the land has been sold back to farmers (not always the original families, who had moved elsewhere, often to Ontario, or who had left farming). The pain is still alive, though. As it is here.
- **Feb. 4** – A bridge repair on Concession Road 8 on the Federal Lands was supposed to start in but the road was closed instead, the bridge access blocked off by massive concrete barriers. Nothing has been done since. Too little traffic, too costly to rebuild, says Transport Canada. Residents and first responders must just take detours.

- **Feb. 18** – CBC Radio’s Ideas program broadcasts “The Forever Protest” – about three long-running Canadian protests, ours being one of them.
- **Feb. 21** – The aviation sector is in deep trouble as countries keep their borders closed to international passenger flights and the pandemic wreaks havoc on all aspects of the industry. In 2020, Toronto Pearson reported that its airline passenger business plummeted to 1996 levels. Compared with 2019, total air passenger numbers dropped from 50.5M to 13.3M and aircraft movements from 453k to 175k. Had Pickering airport been built or even started, it would now be another ghost airport.
- Pickering’s mayor continues to push his industrial airport idea: “This business model ... doesn’t focus on passengers. Instead, it will be dedicated to the science, technology, and industry of planes. Let’s focus on creating a large and dynamic economic development zone – the kind that organically grows and develops around airports.” He claims that KPMG had made “a business case for an aeronautics industry hub focusing on large-scale aviation industrial businesses, such as aircraft/components, maintenance and overhaul, avionic systems, and cargo operations.”
- **Feb. 25** – Our MP, Jennifer O’Connell, introduces two new petitions in the House of Commons; both ask that Ottawa abandon any plans for a Pickering airport. One stresses the need to keep the Lands agricultural, the other asks that they be added to Rouge National Urban Park, and that leases be lengthened to aid recovery. These petitions come from concerned citizens, not Land Over Landings.
- **Mar. 5** – A CBC article describes how the aviation industry has been slow to evolve as climate change bears down on us. Andrew Murphy, director of aviation for Transport and Environment, a European non-profit, says: “The aviation sector has constantly put off having to reduce its own emissions ... And that’s catching up with it because it doesn’t have the technologies and the solutions in place ... The airline sector doesn’t have a plan to date, and it’s kind of scrambling to come up with one.” At the same time, orders for new aircraft have dropped to record lows.
- **Mar. 10** – Reuters reports that, in 2020, air-passenger travel in the U.S. fell by 60%, to its lowest level since 1984, and it is expected that demand will continue to be depressed throughout most of 2021. The Canada-U.S. border is still largely closed, and quarantining is required for passengers arriving from the U.S. (and elsewhere, of course).
- **Mar. 31** – Airports large and small, existing or planned, are facing opposition. A few recent examples: Oshawa (invasive noise); Orillia (planned expansion would harm wetland); Waterloo (planned expansion would destroy wetland); Bristol, U.K. (planned expansion called “surreal in a climate emergency”); Lisbon, Portugal (second airport rejected by regulators when no local municipalities would support it); Paris, France (4th runway for Charles De Gaulle airport abandoned as “obsolete”) ...
- **Apr. 1** – New research out of Cornell University has found that rising temperatures are having a slowing effect on agricultural yields; field and livestock productivity is down by 21% since 1961.
- **Apr. 8** – We write to Regional Chair John Henry, requesting that the Region’s seriously misleading website post of March 9, 2020, on the KPMG report, be corrected. Or better still, that the Region post a new and accurate accounting of the results of the KPMG study. Our letter includes an attachment in which we compare the Region’s claims with what KPMG’s report actually said. We copy the letter to all local councils, our MP, the media, and others.
- **Apr. 15** – Region advises, in response to our letter, that their webpage is being reviewed for inaccuracies, and corrections will be made if required. [As of June 23, 2021, there have been no changes.]

- **May 2** – Premier Ford appoints a new Greenbelt Council Chair, Norm Sterling, to replace David Crombie, who had resigned in November, calling the Ford government’s actions “high-level bombing” that “needs to be resisted.” The new appointment doesn’t bode well. In 2015, Sterling voted against the creation of the Greenbelt.
- **May 3** – City of Pickering Exec. Committee (virtual) meeting: there is a report by Fiaz Jadoon, Director, Economic Development & Strategic Projects, on the status of the Local Food Strategy Project he’d been tasked with overseeing last August. Report has little to show for 9 months of “outreach” The project seems to have been mismanaged, and there is an obvious lack of understanding of the agricultural community’s needs, schedules, and pressures.
- **May 10** – At the request of Ontario Nature, we provide information for a new Story Map, about areas of ecological and cultural importance in the province. Policy
- **May 13** – We start our review of Durham Region’s Proposed Directions Report, as part of the Municipal Comprehensive Review prior to updating the Region’s Official Plan. Lots to comment on with regard to airport references and requests for urban boundary expansions onto prime farmland.
- **May 25** – ClimateFast is putting together a webcast series on farming through a climate lens and we agree to be among the presenters on July 12.
- **May 27** – Land Over Landings is invited by Wildlands League (a chapter of CPAWS) to be part of the panel at the People’s Summit: Protecting Areas in Ontario, in June.
- **May 28** – We submit our formal comments to the City of Pickering on the importance of, and the problems with, their Local Food Strategy initiative.
- **Jun. 7** – At tonight’s (virtual) Council meeting, our Chair, speaking as a 40-year resident of Brougham, delivers a blistering criticism of Pickering Council’s public claims of a “planned” Pickering airport. Two other delegations speak against an airport; one speaks for. All protests are to no avail. Council votes 5-2 to embed the misleading wording in their contribution to the Region’s Comprehensive Review.
- **Jun. 12** – Land Over Landings is awarded the coveted Steve Houndsell Greenway Award by Ontario Nature, for “working to preserve the rich farmland and natural heritage features of the former airport lands in north Pickering.”
- **Jun. 17** – Our Chair participates in a Greater Golden Horseshoe panel hosted by Wildlands League at the (virtual) People’s Summit, presenting a memorable new video of the Lands and their history.
- **Jun. 18** – The Christian Farmers Federation of Ontario proposes that “all prime agricultural areas (as defined by OMAFRA) be added to the Greenbelt.” This would include virtually all of the Federal Lands.
- **Jun. 26** – We submit our formal comments and recommendations during Phase 2 of Durham Region’s Municipal Comprehensive Review. Five other organizations endorse our submission and signed onto it: Ontario Nature, Pickering Naturalists, North Durham Nature, York Region Environmental Alliance (YREA), and Environmental Action Now Ajax-Pickering (EANAP). Our submission prompts Green Durham Alliance (GDA) to send in a strong submission of their own.
- **Jun. 28** – We begin work on a new save-the-Lands campaign with CPAWS Wildlands League.
- **Jul. 5** – Federal Transport Minister Omar Alghabra announces plans to build an all-new high frequency rail line connecting Toronto, Ottawa, Montreal, and Quebec City. The procurement process will start in the fall, once necessary consultations are completed. Dedicated routes in and

out of city centres will be negotiated with partner railways. And although the routes haven't yet been announced (or maybe even determined), we can't help wondering if the Toronto-Ottawa line will be along the Havelock Line that crosses RNUP and the Pickering Federal Lands.

- **Jul. 8** – Wildlands League launches a new Call to Action page, asking Ottawa to save the Federal Lands by adding them to Rouge National Urban Park.

Ottawa announces that Peterborough will be a key stop on the new high-frequency rail line between Toronto and Quebec City, to be opened in 2030. So far, at least, Pickering will not have a stop, although the line will run through the Federal Lands.

- **Jul. 9** – Richard Florida, co-speaker at the “GTA’s New Economic Engine” aerotropolis event of April 9, 2019 (when he felt obliged to define “Luddite” as he denigrated those disapproving of the concept), tweets in response to former astronaut Chris Hadfield’s tweet about his first commercial flight in 16 months: “This is one part of work/life I am NOT looking forward to....” Hypocrite.
- **Jul. 12** – Our chair participates in Toronto-based ClimateFast’s Zoom event, “Groundwork: The Challenge and Promise of Regenerative Agriculture,” pointing the audience to Wildland League’s Call to Action and presenting our new video on the Lands’ history and agricultural potential.
- **Jul. 16** – Pickering Library promotes on its website a Learn-To Camp under the heading “The Rouge: Canada’s First National Urban Park.” A first pro-Park acknowledgement by Pickering. Are things changing?
- **Aug. 13** – The Waterfront Regeneration Trust sends a powerful letter to Johnathan Wilkinson, Minister of Environment and Climate Change, asking Ottawa to “banish the spectre of a future Pickering airport” and to “transfer the fertile Pickering Lands to Parks Canada’s stewardship.” The letter is sent by the Trust’s board of directors, David Crombie, Keith Laushway, Pauline Browne, and Ann Mulvale, and copied to, among others, Pickering’s MP, Scarborough’s MP, Parks Canada senior staff, Pickering’s mayor, and Land Over Landings’ chair.

Revised 13 August 2021
